

Sentiment Analysis with Fast API

GitHub Repository

<https://github.com/rotoncsedu/Sentiment-Analysis-with-FastAPI>

Model Used

A GRU (Gated Recurrent Unit) neural network, implemented in PyTorch and trained on the IMDB movie review dataset. Given a raw text review, the model predicts whether the sentiment is POSITIVE or NEGATIVE, along with a confidence probability.

API Endpoints

- **GET /** — Returns basic API metadata (name and description)
- **GET /health** — Health check endpoint, returns API status
- **POST /predict** — Accepts a JSON body
